Bridging Innovation and Learning in TVET
The Bridging Innovation and Learning in TVET (BILT) project provides TVET stakeholders with a platform for exchange and supports them to address current challenges in TVET systems, which arise due to technological, social, environmental, and workplace changes.

Within BILT, the overarching thematic area is New Qualifications and Competencies in TVET, which is supported by four work streams:

- Digitalization and TVET,
- Greening TVET,
- Entrepreneurship in TVET, and
- Migration and TVET.

Through regular knowledge exchange, thematic project activities, and expert working groups, BILT offers opportunities for collaboration between UNEVOC Centres and TVET stakeholders in Europe, and a platform for bridging of innovation and learning between European UNEVOC Centers and TVET stakeholders in the Asia-Pacific and Africa regions.

The results of ongoing activities are accessible on BILT’s web page and will be disseminated during a BILT Learning Forum.

The BILT project is carried out in collaboration with UNEVOC Network members, coordinated by UNESCO-UNEVOC with support of the German Federal Institute for Vocational Education and Training (BIBB), and sponsored by the German Federal Ministry of Education and Research (BMBF).

Our goals

- To exchange on innovative practices and how TVET systems address their integration
- To explore the processes of identification, formalization and implementation of new qualifications and competencies that are needed for modern, competitive TVET systems and attractive career paths
- To activate the European Cluster of the UNEVOC Network through bridging experiences and peer learning
- To create opportunities to bridge innovation and learning between Europe, Africa and Asia-Pacific
BILT work streams

**New qualifications and competencies**
Identifying new qualifications and competencies related to the other BILT themes, and ways how these can be put into practice, ensuring future-oriented, attractive TVET career paths.

**Greening**
Responding to new development paradigms and societal demands for sustainability and reduced environmental impact, and moving towards greener economies and societies.

**Entrepreneurship**
Unlocking the potential of innovative entrepreneurial activities and fostering entrepreneurial culture.

**Migration**
Accelerating the integration of migrants into their host communities, and allowing them to become productive members of the workforce, whether migration is driven by displacement, employment, education or family reasons.

**Digitalization**
Providing response to new skills demands, as technology has permeated the world of work and is changing the profile of jobs.
Work stream workshops
Oct.-Dec. 2019

BILT Kick-off Conference
10-11 July 2019

BILT Launch
2 Dec. 2019

BILT trends mapping study on
New Qualifications and Competencies
Mar.-Aug. 2020

BILT Virtual Conference on
New Qualifications and Competencies
1-12 June 2020

Expert group on New Qualifications and
Competencies
Q3 2020 - Q3 2021

European Conference
Q1 2021

Conferences with Africa and
Asia and the Pacific
Q1-Q2 2021

BILT Learning Forum
Q4 2021
