

Bridging Innovation and Learning in TVET

Background

The Bridging Innovation and Learning in TVET (BILT) project provides TVET stakeholders with a platform for exchange and supports them to address current challenges in TVET systems, which arise due to technological, social, environmental, and workplace changes.

Within BILT, the overarching thematic area is New Qualifications and Competencies in TVET, which is supported by four work streams:

- Digitalization and TVET,
- Greening TVET,
- Entrepreneurship in TVET, and
- Migration and TVET.

Through regular knowledge exchange, thematic project activities, and expert working groups, BILT offers opportunities for collaboration between UNEVOC Centres and TVET stakeholders in Europe, and a platform for bridging of innovation and learning between European UNEVOC Centers and TVET stakeholders in the Asia-Pacific and Africa regions.

The results of ongoing activities are accessible on BILT's web page and will be disseminated during a BILT Learning Forum.

The BILT project is implemented by UNESCO-UNEVOC with support of the German Federal Institute for Vocational Education and Training (BIBB) and sponsored by the German Federal Ministry of Education and Research (BMBF).

Our goals

- To exchange on innovative practices and how TVET systems address their integration
- To explore the processes of identification, formalization and implementation of new qualifications and competencies that are needed for modern, competitive TVET systems and attractive career paths
- To activate the European Cluster of the UNEVOC Network through bridging experiences and peer learning
- To create opportunities to bridge innovation and learning between Europe, Africa and Asia-Pacific

Tackling TVET challenges through peer learning on

New Qualifications and Competencies

How can they be put into practice, ensuring future-oriented, attractive TVET career paths?

- **Identification** through suitable approaches and instruments;
- **Integration** into curricula and training regulations; and
- **Implementation** in teaching and training approaches.

Entrepreneurship

Unlocking the potential of innovative entrepreneurial activities and fostering entrepreneurial culture

Greening

Responding to new development paradigms for sustainability and reduced environmental impact

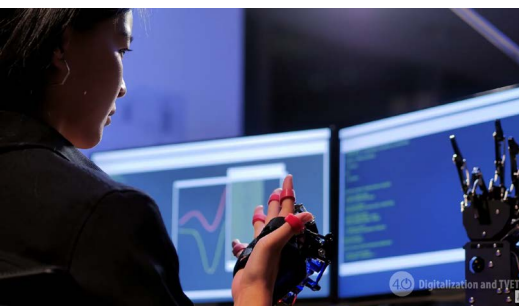

Digitalization

Providing response to new skills demand, as technology has permeated the world of work and is changing the profile of jobs

Migration

Accelerating the integration of migrants into their host communities, and allowing them to become productive members of the workforce

Project timeline

BILT Learning Forum
December 2021

Bridging Africa and Europe: New Qualifications
and Competencies in TVET conference
June 2021

Bridging Asia-Pacific and Europe: New Qualifications
and Competencies in TVET conference
April 2021

Expert group on New Qualifications and
Competencies
Q3 2020 - Q3 2021

BILT Virtual Conference on
New Qualifications and Competencies
June 2020

BILT trends mapping study on
New Qualifications and Competencies
March-August 2020

BILT Launch
December 2019

Work stream workshops
October-December 2019

BILT Kick-off Conference
July 2019
