Entrepreneurial and Green Competences

- The key for delivering green and entrepreneurial learning to students is teachers/trainers to develop and strengthen their competences.

- Overview of the European Competence Frameworks: EntreComp & GreenComp

- Main focus on soft skills. The technical are defined with the Ethiopian occupational standards.

What is needed based on the assessment?

- Clear understanding of Green & Entrepreneurial teaching and learning

- Ability to plan lessons to create motivating and inspiring green learning environments with the available resources

- Examples of teaching methods for Green & Entrepreneurial learning

- Assessment and self-assessment

- Effective entrepreneurial training among teachers/trainers who do not teach entrepreneurship as their primary subject. This need is expanded with green approaches and green teaching methods.

- Stronger collaboration with other educators and stakeholders
