Director

Bureau of Vocational Education Research and Development

Office of Vocational Education Commission Thailand

VISION

The Office of the Vocational Education Commission aims to foster the production and advancement of skilled and high performance vocational personnel, with the ultimate goal of contributing to the overall progress and prosperity of the nation.

PHILOSOPHY

The Office of the Vocational Education Commission aims to foster the production and advancement of skilled and proficient vocational personnel, with the ultimate goal of contributing to the overall progress and prosperity of the nation.

MISSION

The mission of the Office of the Vocational Education Commission is to:

1. Cultivate a highly skilled and proficient vocational workforce capable of addressing the demands of national development.
2. Increase access to educational opportunities, ensuring vocational continuity and promoting equality and fairness.
3. Establish and expand a comprehensive network of cooperation with all sectors involved in management development courses and professional training.
4. Enhance the quality of curriculum and learning management to meet the evolving needs of future education, while linking to national and international professional standards and performance criteria.
5. Foster the professional development of vocational teachers and staff to achieve peak performance.
6. Foster learning innovations and digital management practices to optimize education and training outcomes.

ESTABLISHMENT OBJECTIVES

To produce human capital at the level of technicians and advanced technology

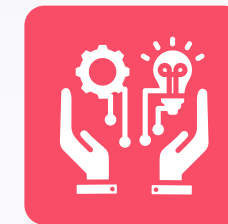

To develop educational institutions to be excellent in the field that are related to the needs of the community, society and national development strategies..

To promote and support the cooperation of the public, private and industrial sectors both domestically and internationally.

To develop teacher's competencies and boost professional experiences that meet the demand of the institution.

To enhance the professional and entrepreneurial skills of students and the public to have new knowledge and skills that are necessary to continuously change the technology and innovation.

EDUCATIONAL INSTITUTION QUALITY DEVELOPMENT GOALS

1 Educational institutions have management innovations that are consistent with the context and respond to the needs of communities, society and national development strategies.

2 The institution has partnership with cooperation networks, professional organizations, business establishments, vocational education institutions, and higher education both in the country and abroad.

3 The curriculum aligns with professional standards in the National Qualifications Framework linking professional competencies to work with the educational qualification system.

4 Teachers have modern professional competencies in line with the technology currently used by establishments.

5 Learners have professional competencies in the field of excellence that satisfy the needs of innovative enterprises.

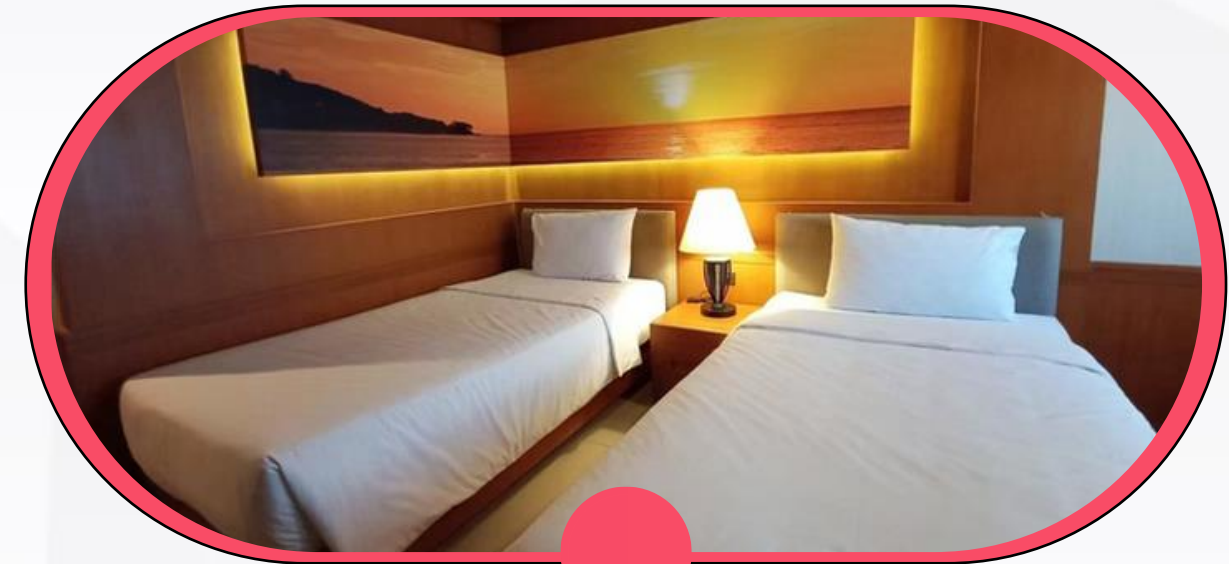

6 The educational institution is a center for career development and entrepreneurship, evaluating personal competencies in accordance with professional standards corresponding to fields of excellence.

7 Educational institutions have a quality assurance system that meets educational standards suitable for curriculum management, learning media technology, and learning resources.
